DETAILED ACTION

1. Applicant's election without traverse of species I, claims 1-9 in the reply filed on 1/25/05 is acknowledged.

2. Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 10-14, directed to the species of non-elected invention no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification, page 7, line 13, "stopper f4" has been changed to – stopper 14 --.

In claim 5, line 1, "said deflectable structure" has been changed to – said flexible structure --.

Art Unit: 3727

4. The following changes to the drawings have been made by the examiner: In fig 1, number "14", showing the upper end of the straw, has been changed to "24". In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

5. The following is an examiner's statement of reasons for allowance: Claims 1-14 have been allowed because the prior art of record does not disclose or suggest an apparatus for holding and dispensing a beverage, the apparatus comprising a bottle, a cap, a straw, a stopper held on the straw within the bottle, the stopper and straw are movable together with the cap removed from the bottle into a deployed position with the stopper disposed with the neck of the bottle and with the upper portion of the straw extending outward from the bottle. The stopper includes a flexible structure holding the stopper within the neck of the bottle in the deployed position, and air path extending through the stopper, a straw hole through which the straw extends, and a flexible member moving into an open position to admit air into the bottle through the air path with the stopper in the deployed position when suction is applied to the bottle through the straw and a closing position to prevent the movement of air through the air path with the stopper in the deployed position when suction is not applied to the bottle through the straw.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
